

DCX3520e-M

HD DUAL TUNER DVR SET-TOP

PRODUCT OVERVIEW:

The DCX3520e-M includes the latest audio and video output, with support for full 1080p60 high-definition output, HDMI™, award-winning Dolby® Digital Plus, and Dolby Volume intelligent multi-channel audio leveling. In addition, the DCX3520e-M features an internal 500 GB hard drive, which can be expanded to 1 TB or more using an external disk drive connected to the set-top's eSATA interface. The DCX3520e-M is compatible with the ARRIS DCT legacy software API set. The DCX3520e-M also supports new software enhancements by ARRIS for processing 3D video and graphics in the set-top prior to being delivered to a 3D-compatible television for an exceptional high-quality 3D TV viewing experience.

BANDWIDTH EFFICIENCY SOLUTIONS

With support for MPEG-4 video, the DCX3520e-M allows operators to use limited bandwidth to provide high-definition programming and high-bandwidth advanced applications.

Dual 1 GHz digital video tuners support future plant expansion, enabling operators to increase the number of available channels. The DCX3520e-M supports Switched Digital Video (SDV) solutions, which maximize bandwidth by delivering programming only where and when subscribers request it.

MULTI-ROOM DVR

The DCX3520e-M set-top offers an integrated MoCA® home networking interface, which allows it to serve as a multimedia hub for sharing content with other compatible devices in the home, creating an IP home network. This feature provides consumers ultimate control and flexibility over their media choices, viewing interest, and entertainment lifestyles while providing access to their digital content in any room of their home, any time they want it.

ENVIRONMENTALLY CONSCIOUS

In addition to providing industry-leading features and performance, the ARRIS DCX3520e-M was designed with the environment in mind. The DCX3520e-M is 33 percent lighter than previous models, requiring less material in development, and the product bezel is built with 20 percent post-consumer recycled plastic, a significant environmental innovation. The packaging uses 75 percent recycled-content cardboard and is 100 percent recyclable, and is marked with standard recycling codes to help customers identify recycling opportunities.

REMOTE DIAGNOSTIC CAPABILITIES

The DCX3520e-M works with the ARRIS SmartStream Terminal Data Collector (STDC) to report set-top status for evaluation and corrective action, enabling operators to isolate and troubleshoot plant issues, improve service quality, and reduce operational costs.

FEATURES
