

Managed Wi-Fi.

A complete managed Wi-Fi service designed to maximize savings, performance and improve customer experience.

Experience smarter connectivity.

Connected devices:

A commercial cloud-based Wi-Fi infrastructure, combined with remote monitoring from Cogeco.

Seamless wireless experience¹:

A service that provides Wi-Fi coverage to employees, guests and residents for more productivity, collaboration and satisfaction.

Scalable Wi-Fi architecture:

A professional network configuration and design that meets the specifics of single and multi-location businesses.

Smart and branded Wi-Fi:

A portal to customize your guests' online experience, and see real-time data reports on usage, loyalty and engagement KPIs.

Discover peace of mind.

Predictable costs:

Monthly pricing per access point (AP) that includes hardware rental, application updates, monitoring, end-user support and maintenance.

Simplified network management:

An out-of-box solution that comes with a Wi-Fi management portal and pre-configured user experience for staff, guests or residents.

Secure and quick wireless access:

Your employees can connect to the Internet and your internal network, along with a separate access for your guests or residents.

One trusted connectivity provider:

Get reliable Internet and Managed Wi-Fi from a single-source that owns its network and takes care of capital expenses.

"I've had a wonderful experience with Cogeco in general. I've referred many of my customers to Cogeco over the past couple of years and I have heard no complaints from anyone during that time."

Dave Mitchell,
Sole Owner, Computer Plus,
Perth, Ontario

Why Managed Wi-Fi?

As your partner in connectivity, Cogeco has the expertise to deliver you a powerful Managed Wi-Fi solution. From the assessment of your needs and design of your network, to the implementation and maintenance of it, everything is professionally taken care of by Cogeco.

Wi-Fi management portal

- Wi-Fi network settings
- Customizable guest splash page
- Real-time infrastructure monitoring
- Guest traffic analytics
- Monthly email report

Support, maintenance and monitoring

- 24/7 phone support for guests and employees
- Remote network monitoring

Commercial Wi-Fi infrastructure

- Outdoor and indoor enterprise grade access points
- Coverage of up to 2,500 square feet per access point
- Enterprise grade switch with built-in firewall
- Up to 40 connected devices per access point
- Bandwidth is shared equally between all connected devices to ensure optimal and secure connections within your location.
- Employees get up to 30 Mbps download and 15 Mbps upload speeds, and guests get 20 Mbps and 8 Mbps respectively.

Pre-configured Wi-Fi networks

- Private network for staff protected by a password
- Open network for guests or residents, connection via a splash page
- Shared bandwidth for optimal connectivity on every device
- Web content filtering for guest network
- Auto-connection option for long-term residents

Customization

Cogeco Managed Wi-Fi is a service that can be adjusted to your business' specific needs.² Our Business specialists can help you choose the perfect package for your business.

Professional Wi-Fi design and installation

- Wi-Fi design with floor plan prior to installation
- Ethernet cable deployment included
- Ceiling or wall installation with no visible cables
- Wi-Fi test performed after the installation
